A contour plot showing the joint posterior distribution for parameters α_0 and α_1 . The x-axis represents α_0 and the y-axis represents α_1 , both ranging from -2 to 2. The plot features several nested contour lines representing different probability density levels. Two specific points are highlighted with red circles: one at approximately (-0.8, 0.6) labeled "C-062" and another at approximately (0.7, -0.9) labeled "C-9915". Various contour labels are visible, including $5e-04$, 0.001 , 0.002 , 0.003 , $1e-04$, $3e-04$, and $2e-04$.
